EXPERIENCE

JR. RPA DEVELOPER
WILCON DEPOT INC.
Oct 2024 to Present

- Develop Automated Workflows: **Design, develop, and implement automation solutions to streamline repetitive tasks across various departments including Human Resources, Finance, and Administration, ensuring increased operational efficiency and reduced manual workload.**
- Testing and Debugging: **Conduct thorough testing of newly developed automation workflows to ensure functionality, accuracy, and reliability. Diagnose and resolve issues in existing automation scripts and systems to maintain smooth operations.**
- Cross-Departmental Collaboration: **Work closely with department stakeholders to identify automation opportunities, gather requirements, and deliver tailored RPA solutions that align with business objectives.**
- Tool Utilization: **Leverage RPA tools such as n8n, RAX Editor, and custom scripting to create, deploy, and manage automated processes.**
- Scripting and Development: **Write and maintain scripts using Python, JavaScript, and VBScript to support and extend automation capabilities where needed.**
- Documentation and Maintenance: **Maintain comprehensive documentation for all automated processes, including workflows, scripts, and operational procedures, to support transparency and future scalability.**
- **Continuous Improvement: Monitor and analyze automated processes for improvement opportunities, incorporating feedback and enhancing performance over time.**

FREELANCE WEB DEVELOPER
ROOCHE DIGITAL COMPANY
June 2024 to Sept 2024 (Project based)

- **As a freelance web developer, I was tasked with enhancing an existing medical healthcare web application. This involved utilizing ReactJS for the front-end and Ruby on Rails for the back-end to implement new features.**
